DataSheet

Effective fire alarm systems supports with the protection of people, property and assets.

Issue an effective warning in the event of a fire with the Commander Site Alarm range – now available as a single push button alarm or connect up to 20 units* across the site with the NEW Commander Wireless Site Alarm.

NEW PRODUCT

COMMANDER SITE ALARM RANGE

COMMANDER®

With its incredible 105dB siren and flashing LED strobe, the Commander Single Site Alarm range can be heard loud and clear in the noisiest of environments and at a great distance.

Manufactured from ABS plastic, it's incredibly tough and water resistant, making it the ideal fire safety solution for a vast number of industries, such as construction and holiday parks, as well as outdoor events and festivals.

NEW for 2024 – you can now connect up to 20 alarms with a distance of up to 100m* in open air with the New Commander Wireless Site Alarm!

Connection Distance (Open Air)	N/A	>100m

* Approximately 20 devices can be linked, however the environment in which the alarms are installed can have an effect on this such as heavy obstruction in between units can cause signal to weaken for example.

We recommend that range tests are carried out first to ensure the positioning of the alarms are suitable.
