

Magnetic & cord strap holder/receiver

Overview

The magnetic & cord strap holder/receiver is designed for use with the Skipper XS (although it can be used as a standard tape receiver). As well as being able to attach to magnetic surfaces, it can also be tied to pillars using the provided 'tourniquet' cord. Once in place the receiver can then either hold the Skipper XS unit in place or be used to receive the tape end clip.

Product Specifications	
Width: 129mm	Height: 105mm
Depth: 19mm	Weight: 105g

Key selling points

- Holds the Skipper XS unit via its connector points or receives any Skipper tape end clip
- Attach to any pillar or post

Key features

- Soft pads to prevent scratching to surfaces
- Includes a surface protector to prevent damage to the back of the pillar
- Has magnets to attach to magnetic surfaces

The magnetic and cord strap holder/receiver can hold the Skipper XS unit, or receive any Skipper tape end clip

Product FAQs

- Q. What is the tourniquet cord made from?**
A. The tourniquet cord is made from 8mm diameter bungee cord, which is 600mm long. It has a stopper on one end to prevent the cord from slipping through one hole
- Q. How exactly does the cord strap holder/receiver work?**
A. Simply hold the clip in position on the pillar, then thread the cord through the left hole, round the pillar, then back through the right hole. Then pull the cord down to tighten. Full instructions are provided.
